

# Health & Safety Management Systems Review

- ? Do you have a health and safety management system at your farm?
- ? Would you like a review conducted of your system by a set of independent eyes?
- ? Please note the review tool assesses both general health and safety requirements as well as considering commodity specific health and safety issues.
- ? All reviews include a report and action plan.

## FAQs

### What does the review entail?

The review considers:

- Type of farming
- Number of workers
- Number of contractors
- Types of machinery and equipment
- Training
- Policy and procedures
- Induction
- Safe systems of work

The review will give consideration to the system established to manage health and safety and includes an escorted tour of the farm.
